

Goal: Implement additional features to better flesh out the website's functionality and feel.

Tasks:

1. [3] As a user, I want to save music that I listened to so that I can listen to the music again if I liked it.
 - a. Implement UI to save songs [1]
 - b. Transfer file from AWS to user's computer [5]
2. [13] As a user, I want to share a track with someone else so that they may enjoy the music too.
 - a. Implement Social Media plugins to connect to the user's social media accounts [3]
 - b. Implement UI buttons to connect and share songs [2]
 - c. Generate/load URLs to begin at a specific track [5+]
3. [5] As a user, I want a parallax design, so that I can better immerse myself in the style of the website.
 - a. Upload Vertical parallax design template in React [1]
 - b. Finish up design mockup in Illustrator [2]
 - c. Implement design [4]
4. [5] As a user, I want seamless audio controls so that the controls do not disrupt my listening immersion.
 - a. Use JavaScript/React or plugins to implement custom audio controls [3]
 - i. Play
 - ii. Volume control
 - b. Use CSS to style the controls to blend into the design[4]
